## HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

## DETAILED ACTION

### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Dennis Chen on 6/10/2010.

- In claim 1 line 16, the recitation "*the room*" has been replaced with *—a room—*.
- In claim 6 line 7, the recitation "*the refrigerant circuit*" has been replaced with *—the second refrigerant circuit—*.
- In claim 9 line 6, the recitation "*the refrigerant circuit*" has been replaced with *—the second refrigerant circuit—*.
- In claim 10 line 7, the recitation "*the refrigerant circuit*" has been replaced with *—the second refrigerant circuit—*.
- In claim 11 line 7, the recitation "*the refrigerant circuit*" has been replaced with *—the second refrigerant circuit—*.

### *Election/Restrictions*

2. Claims 1, 2, 4, 21 and 26-28 are directed to an allowable product. Pursuant to the procedures set forth in MPEP § 821.04(B), claims 3, 5-20 and 22-25 previously

Art Unit: 3744

withdrawn from consideration as a result of a restriction requirement, are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Because all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, **the restriction requirement as set forth in the Office action mailed on 7/28/2008 is hereby withdrawn.** In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

***Allowable Subject Matter***

3. Claims 1-28 allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record teach all the limitations of claim 1 except for "first and second four-way selector valves being controlled for providing a flow passage of refrigerant from the compressor to the air heat exchanger and the heat source side heat exchanger and back to the compressor via the first four-way selector valve, while providing a flow passage of refrigerant from the compressor to the first and second adsorption heat exchangers and back to the compressor via the second three-way selector valve." The prior art of record (Jung, US 5,823,006) discloses a reversible cycle refrigeration system that utilizes two

Art Unit: 3744

three-way valves to reverse two respective refrigerant circuits, but not *first and second four-way selector valves being controlled for providing a flow passage of refrigerant from the compressor to the air heat exchanger and the heat source side heat exchanger and back to the compressor via the first four-way selector valve, while providing a flow passage of refrigerant from the compressor to the first and second adsorption heat exchangers and back to the compressor via the second three-way selector valve.*

Although it is well known to provide a reversible cycle refrigeration system that utilizes two three-way valves to reverse two respective refrigerant circuits, there is no teaching in the prior art of record that would, reasonably and absent impermissible hindsight, motivate one having ordinary skill in the art to modify the teachings of the prior art to incorporate *first and second four-way selector valves being controlled for providing a flow passage of refrigerant from the compressor to the air heat exchanger and the heat source side heat exchanger and back to the compressor via the first four-way selector valve, while providing a flow passage of refrigerant from the compressor to the first and second adsorption heat exchangers and back to the compressor via the second three-way selector valve.* Thus, for at least the foregoing reasons, the prior art of record neither anticipates nor rendered obvious the present invention as set forth in claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
